EXPERIENCE

Full-Stack Developer – 4W Service LTD

Apr 2020 – Present · Cyprus-based fintech client

- **Own and operate a production crypto trading platform** that has supported live trading for 2+ years, including signal-filtering logic, real-time WebSocket market data, and the operator admin dashboard.
- **Maintain 99.9% production uptime** for the crypto trading platform by resolving incidents, eliminating recurring failure modes, and hardening critical services.
- **Designed and optimized data models** for real-time trading workloads, including production tables with 150M+ rows and continuous WebSocket market-data ingestion across MariaDB, MySQL, and MongoDB.
- **Mentored a junior developer** through pair programming and code reviews, helping him progress to independently delivering production changes.
- **Automated CI/CD pipelines using GitHub Actions, GitLab CI, and Bitbucket Pipelines**, replacing manual releases with repeatable linting, testing, and zero-downtime deployments.

Full-Stack Developer – Right Information

Dec 2025 – Apr 2026

- **Built and integrated API endpoints, Nuxt 3 composables, and SSR functionality across a Yii2/Nuxt3 monorepo** while maintaining compatibility with the existing legacy platform.
- **Built a component-based page builder in Nuxt 3**, enabling administrators to compose and configure pages dynamically through the CMS without requiring code changes.

INDEPENDENT & CLIENT PROJECTS

PsyLife.me – Personal practice platform

- **Owned PsyLife.me end-to-end**, from architecture and implementation through deployment and production support, including the frontend, API, background jobs,

and real-time notifications. Stack: Nuxt4 frontend, NestJS API, MariaDB, Redis/BullMQ background jobs, and web push notifications.

- **Launched a multilingual UA/RU platform** with an integrated blog/CMS and consultation-booking flow, taking it from architecture through production deployment.

Domodessa.com – Real estate platform

- **Took Domodessa.com from zero to a working production product in ~2 weeks, owning the build end-to-end.** Stack: Nuxt 4, Express, Quasar, MariaDB, Docker, and CI/CD.
- **Built the blog and frontend styling architecture, and resolved Docker networking, SSR, and hydration issues** to keep the application stable across local and production environments.

Thailand Car Rental Platform – thailandrentalcars.com & phuketcarrentals.com · in progress

- **Architected a multi-site car rental platform with a shared backend and admin panel serving two independent Nuxt4 frontends**, designed to support expansion into new cities without duplicating the core system.
- **Designed a transactional booking and payment flow covering authorization, owner confirmation, payment capture, idempotency, and double-booking protection.**
- **Lead a content manager** while owning the project's SEO and launch strategy alongside product engineering.

Psytrauma.pro – Psychology practice group website

- **Built and deployed the website end-to-end** for a psychology practice group, including frontend structure, backend logic, and production setup.

Vladislavioanno.com – Private-client website

- **Delivered a multilingual Nuxt 4 SSR** website for a private client, owning the project from requirements through production deployment, including DevOps and a custom Quasar CMS for content management.
